PROJECTS

- **MealMate** ([view](#)) (Jan'25-May'25)
 - Built a full-stack web application that bridges the gap between students and working professionals living away from home and trusted local tiffin service providers, offering affordable, hygienic, and home-style meals.
 - Implemented role-based access control with JWT authentication, custom dashboards for users and providers, and a responsive, mobile-first UI to manage orders, delivery schedules, and secure route access across devices.
 - Tech Stack: MongoDB, Express.js, Node.js, React.js, Next.js, JWT, Tailwind CSS
 - GitHub link: <https://github.com/ParthChauhan09/MealMate.git>
- **Wanderlust (ongoing)** (May'25-July'25)
 - A platform designed to help users explore and discover curated travel tours and experiences across various destinations. The project focuses on enhancing the travel planning process by connecting users with a wide range of tour options through an intuitive and engaging interface.
 - Developed a secure and responsive travel booking platform with dynamic search and filtering, personalized tour recommendations, booking management with status tracking, and a modular React-based UI for a seamless user experience.
 - Tech Stack: MongoDB, Express.js, Node.js, React.js, JWT, Tailwind CSS

TECHNICAL SKILLS

- **Programming & Scripting Languages:** C, Java, HTML, CSS, JavaScript
- **Tools & Libraries:** React.js, Node.js, Express.js, Tailwind CSS
- **Databases:** MongoDB, MySQL
- **Version Control:** Git, GitHub
- **Authentication & Security:** JWT, Bcrypt, CORS
- **Deployment & Hosting:** Vercel, Render

WORK EXPERIENCE & INTERNSHIPS

- Intern | CSRBOX (July'25-July'25)
 - Successfully completed 15-days virtual internship focused on Data Analytics, conducted in collaboration with IBM SkillsBuild. Gained foundational knowledge of data analytics concepts, data-driven decision-making and hands-on exposure to industry-relevant tools and techniques.
- Team member | DE Project (Jan'25-May'25)
 - Collaborated in a team to design and develop MealMate, a full-stack web application for managing daily meal and tiffin services, showcasing strong teamwork, communication, and coordination throughout the full development lifecycle as part of an academic project.

ACHIVEMENT

- Ongoing contribution to personal projects
- Solved 100+ questions on Leet Code

AREA OF INTEREST

- Web Development
- Data Analytics

HOBBY

- Cricket
- Listening music
- Badminton
